

POP UP BOX CARD
Designed By Debbie O'Neal
Scrapmequickdesigns.com

*I am sharing a pop up box card I made using shapes in Cricut Design Space. Click on the files to download to your Design Space account so you can cut the files too. The Videos listed will help you assembly the Pop Up Box Card. Make your own themes by adding images of your choice to the box and pop up pieces. It's so much fun ! Note: These files are for your **personal use only**. Please do not share them but instead give me credit for the file if you post yourp project and direct others to my site to get the files. Thanks !*

POP UP BOX CARD BASE

Assembly Video: <http://youtu.be/Sui7E8qzMzc>

IMPORTANT TIP: When you open up the pop up box card file in Design Space and send to cut, it is saying you need the 12X24 mat. You DO NOT. Just click the "continue" button and send to mat preview. The base box screen will show first, scroll down the mat and grab the insert piece under the box shape and drag up to the side of the base box and rotate to fit using the rotate handle on the image. Click GO and it will now fit on the 12X12 mat the way I designed it. You won't need to do anything to the other mat screens to fit a 12X2. Sorry for the extra work...when the file saved Design Space decided to change the placement. I made a video to show you how to do this... https://youtu.be/p_iovqF1wAA
